- Problem Solving
- Team Collaboration

CERTIFICATES

Electronic Arts Software Engineering virtual experience program on Forage - October 2024

- Proposed a new feature for the Sims and wrote a Feature Proposal describing it to other stakeholders.
- Built a class diagram and created a header file in C++ with class definitions for each object.
- Patched a bugfix and optimized the Sims codebase by implementing an improved data structure.

Mastercard Cybersecurity virtual experience program on Forage - October 2024

- Completed a job simulation where I served as an analyst on Mastercard's Security Awareness Team
- Helped identify and report security threats such as phishing
- Analyzed and identified which areas of the business needed more robust security training and implemented training courses and procedures for those teams

CompTIA Network+

In Progress

PROJECTS

Weather App (Python)

- Developed a Python-based application that fetched real-time weather data using an API.
- Integrated data handling and API requests, building a functional tool to display weather conditions.
- Gained experience with programming logic, debugging, and implementing clean code.

Personal Website (HTML, CSS, JavaScript)

- Developed and designed a personal website using HTML, CSS, and JavaScript.
- Created a responsive and interactive user interface that displays portfolio content and personal information.
- Applied front-end web development skills including styling, layout design, and basic client-side scripting.
